### MY SKILL SETS:

- 5+ years React.js, Angular, Vue.js
- 3+ years Next.js, Gatsby
- 3+ years Typescript
- 5+ years Node.js
- 2+ years Ruby
- 2+ years Rust experience
- 5+ years Python experience
- 6+ years PHP experience
- 3+ years GraphQL, Apollo
- 2+ years Web3, Solidity, Smart Contract, Ethers.js experience
- 4 years Git/GitHub/GitLab/Bitbucket

Dear Sir/Madam

I just read your job description and am a full stack developer, having 6+ years of experience in building medium and large web applications.

Speaking of the front-end development side, I've been using React.js, Vue.js, Next.js for over 5 years now with the advent of modern JavaScript technology instead of using jQuery-tuned server-side rendering techniques.

I would also like to inform you that I am an experienced backend developer with rich experience in PHP, Node.js, Firebase, MongoDB, Webpack, ES6, and API integration.

My recent experience was building a Headless CMS site using Episerver CMS and Gatsby Framework.

Also, one area that excites me recently is my experience developing cryptocurrency trading sites such as Bitcoin, Ethereum, Binance, and NFTs using Blockchain technology.

### My experiences:

- Back-end and Front-end development
- Payment Integration (PayPal, Stripe, Worldpay...)
- Google Map & Social API integration
- Firebase, CloudStore, Google Cloud integration
- WordPress plugin building and customization.
- Blockchain, Bitcoin, Ethereum, polygon, CEX, DEX, DApp, NFT, Solidity, DeFi games, swap, farms and staking
- Crypto Bot (Pancakeswap, Uniswap, Binance, Bybit, etc..)
- ICO Development with Created Token ( Coin )
- Smart-Contracts(Solidity,Truffle framework) (ERC20,ERC223, ERC721, ERC 1155)

You can check out some of the sites I've built in the past by clicking on the links below:
