MY SKILL SETS:

- 4+ years React.js, Angular, Vue.js
- 2+ years Next.js, Gatsby
- 5+ years Node.js
- 2+ years Ruby
- 2+ years Rust experience
- 5+ years Python experience
- 6+ years PHP experience
- 2+ years GraphQL, Apollo
- 2+ years Web3, Solidity, Smart Contract, Ethers.js experience

Dear Sir/Madam

I just read your job description and I am interested in this position as I am a full stack engineer, having 6+ years of experience in building medium and big web applications.

I would like to inform you that I am highly skilled with Node.js, Firebase, MongoDB, WebPack, ES6, API Integration, as I have handsome experience in it.

As the modern JavaScript technologies came in, rather than using Serverside rendering technologies tuned up with jQuery, I have been using Node.js, React.js, Vue.js, Next.js for 4+ years for Front-end development.

Also, recently, I have experience in developing Cryptocurrency trading sites such as Binance, Ethereum, and NFT using Blockchain technology.

My experiences:

- Back-end and Front-end development
- Payment Integration (PayPal, Stripe, Worldpay...)
- Google Map & Social API integration
- Firebase, CloudStore, Google Cloud integration
- WordPress plugin building and customization.
- Blockchain, Bitcion, Ethereum, polygon, CEX, DEX, DApp, NFT, Solidity, deFI games, swap, farms and staking
- Crypto Bot (Pancakeswap, Uniswap, Binance, Bybit, etc..)
- ICO Development with Created Token (Coin)
- Smart-Contracts(Solidity,Truffle framework) (ERC20,ERC223, ERC721, ERC 1155)

You can find examples of my past building site on the following links.

www.avaxrent.com
www.glovoapp.com
www.mylifecoach.me
www.alltherooms.com
www.mybae.io

I guarantee a high quality of work and keep good communication. With many years of experience working with clients and in a group environment, I put stress on responsibility, communication, and efficiency when collaborating with clients.

You can choose any convenient time from the following time slots.
